

WEBSPEC DESIGN CELEBRATED IN “BEST OF DES MOINES” AWARDS

Local Web Design Firm Recognized in Multiple Categories by *Business Record* Readers

Urbandale, IA USA - September 30, 2016 | Webspec Design has been named “Best Web Developer” by *Business Record* readers for the fifth time in 2016. Webspec owner and founder Jeremiah Terhark has also been recognized as a runner-up for “Best Up and Coming Business Leader.” Both accolades were announced in the *Business Record*’s “Best of Des Moines” issue.

These awards arrive alongside a milestone anniversary for Webspec, who recently celebrated 15 years in business and 10 years in the city of Urbandale. The company donated \$15,000 to local nonprofit organizations as part of their anniversary celebration on September 15.

*The Webspec Design team gave \$15,000 back to the community during **Game On: Celebrating 15 Years.***

“Being named ‘Best Web Developer’ for the fifth time the same month we celebrated our 15th anniversary is better than icing on the cake — it’s more like a second helping,” said Terhark. “I’m just blown away by the support the team continues to get from the community. We pride ourselves in providing the best digital solutions for our clients each day, so I’m humbled by the recognition and could not be more proud of my team.”

Although Webspec has been named as “Best Web Developer” in past years, the “Best Up and Coming Business Leader” runner-up mention came as a surprise to Terhark. “To be in the same category with so many highly respected influencers in the Des Moines area is an honor. I try to surround myself with the most talented and creative people in both my personal and professional life, so it’s exciting to be in such great company,” said Terhark.

Webspec Design would like to congratulate all of the other “Best of Des Moines” winners and thank their clients, family, friends, and other readers for voting.
